

Concierge Engineering, Prototyping, and Manufacturing

15601 Graham Street, Huntington Beach, CA 92649 | info@forwardegr.com | www.forwardegr.com

Focused Engineering
Optimized Solutions
Rapid Prototyping
Working Partnerships
Advanced Design
Reliable Execution
Delivered Results

Engineering Solutions Built Around You

Forward Engineering was founded on the principle of delivering concierge-level engineering and manufacturing services, partnering with organizations that require innovative hardware and equipment solutions. Backed by professional engineering credentials and decades of hands-on experience, we bring deep expertise in mechanical design, prototyping, product development, and manufacturing.

We collaborate with industry leaders to transform complex concepts into practical, high-quality solutions—always with a commitment to craftsmanship, precision, and integrity. By combining technical excellence with a customer-first mindset, we provide tailored support that efficiently moves your product from concept to reality.

ENGINEERING

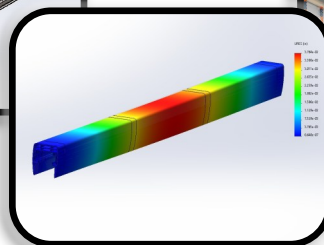

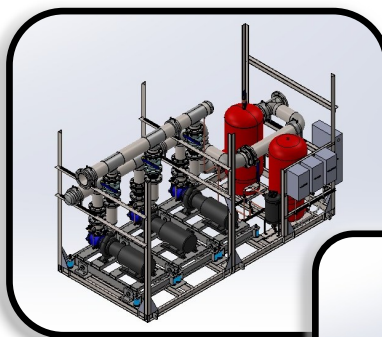

- Product Research and Development Engineering
- Intellectual Property Development
- Product Technical Data Packages
- R&D, Manufacturing, and Service Fixture Development
- Technical Design Review
- Mechanical Design and Analysis
- Repair Engineering
- Computer Aided Design (CAD)
- Reverse Engineering
- Materials Analysis and Testing
- Value Added Engineering
- Bill of Materials Development
- Systems Engineering

Sample NAICS Codes:

541330, 541340, 541715, 541420, 541690,
332710, 333514, 332999

PROTOTYPING

- Product concept prototyping
- Custom fixture build and integration

MANUFACTURING

- Manufacturability Review
- 3 and 5 axis CNC
- Welding
- Additive Manufacturing
- Assembly and Test
- Short-Run Manufacturing
